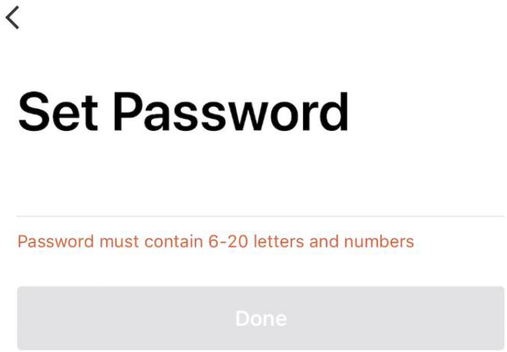

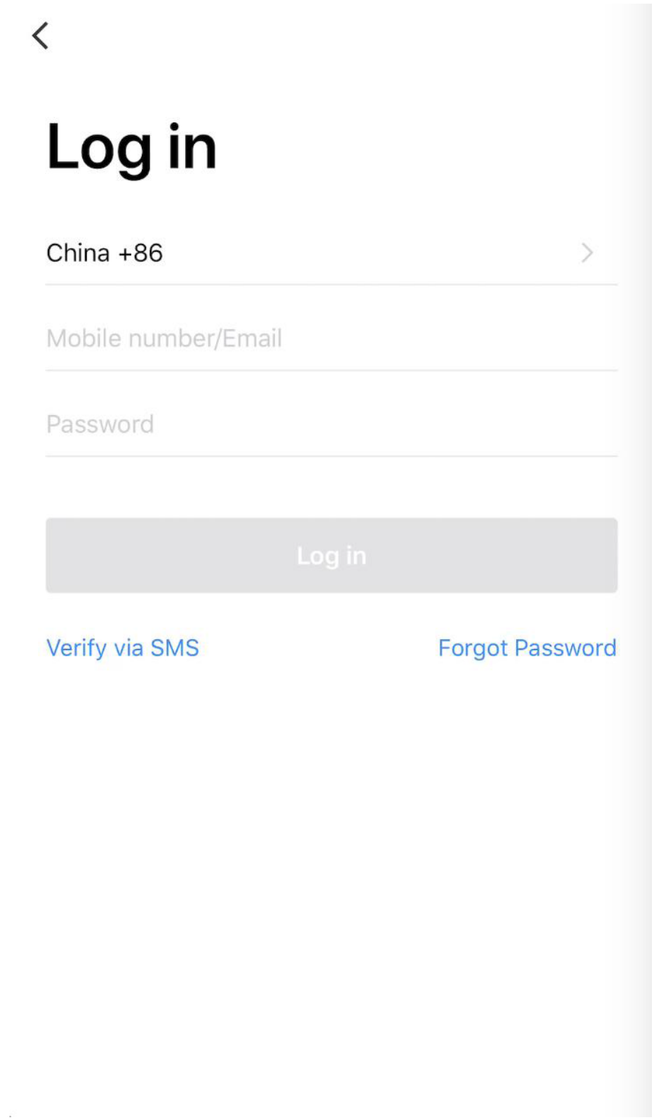

Fig. 3

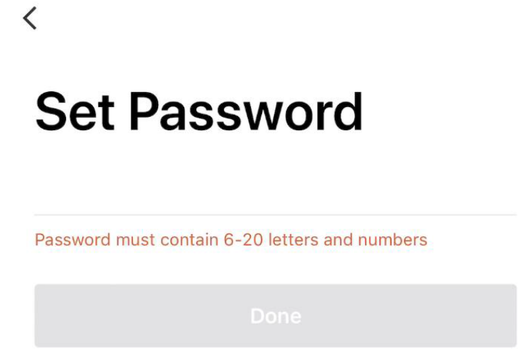

Fig. 4

NO.3.1 Household/Member Management

Click the pull-down arrow at the top left corner of "My Household" to add a household and manage households.
One account can manage multiple households at the same time. The user can operate a device in a household by selecting it in the household menu.

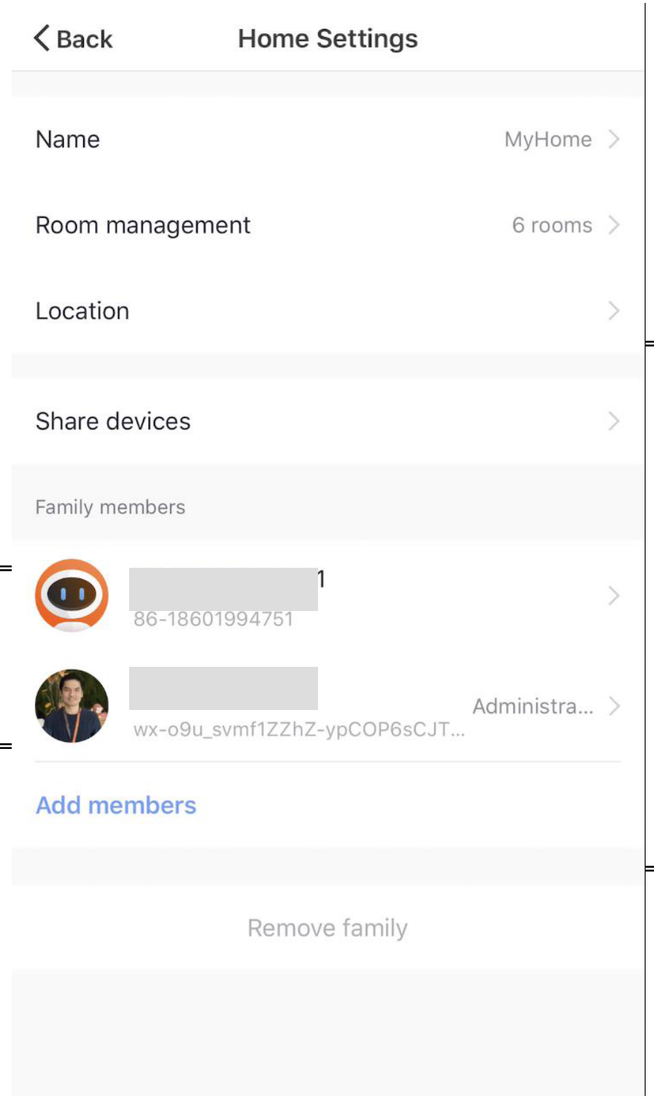

NO.3.1 Household/Member Management

Click Chen's Household to go to the household settings, as shown in the figure

Combine and classify administrative access of different individuals to devices. All devices and smart scenarios in a household can be shared among household members without having to complete the sharing settings each time

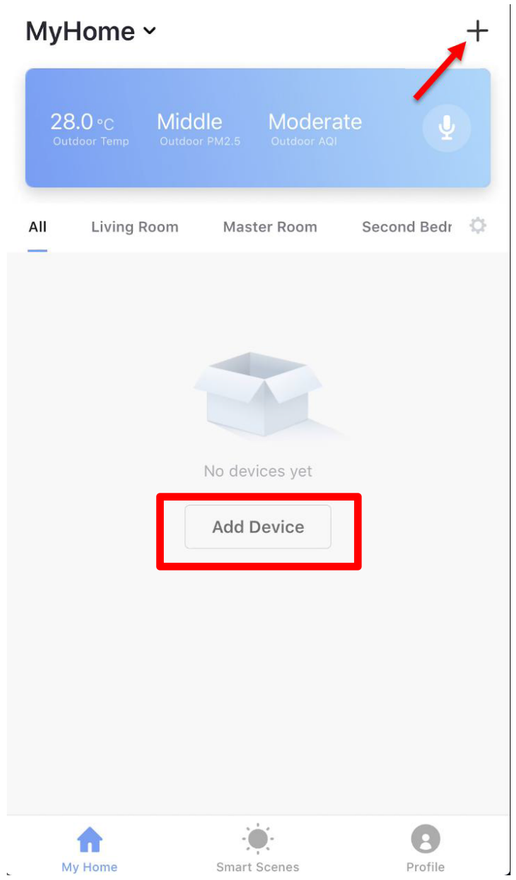

Other household members can enjoy control of smart devices in the household, but will not be able to modify, add, or delete a device

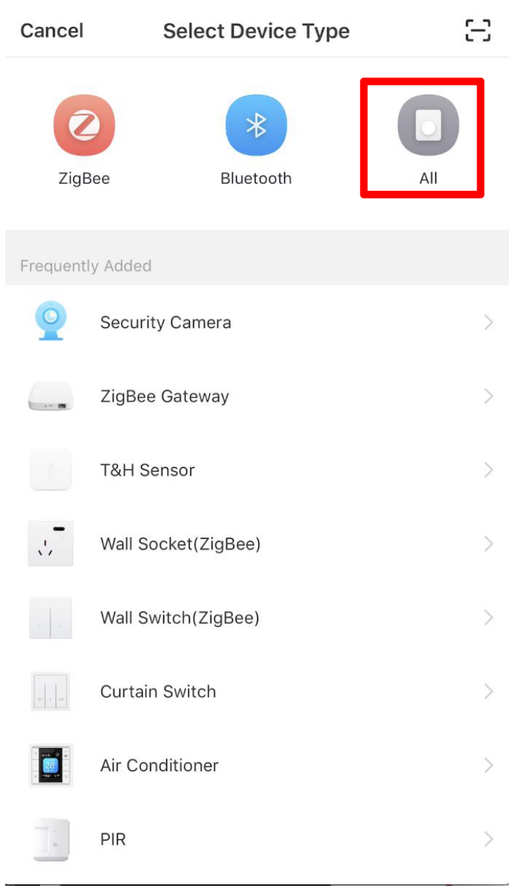

Add/Delete rooms in a household and manage all room settings in a household in one place

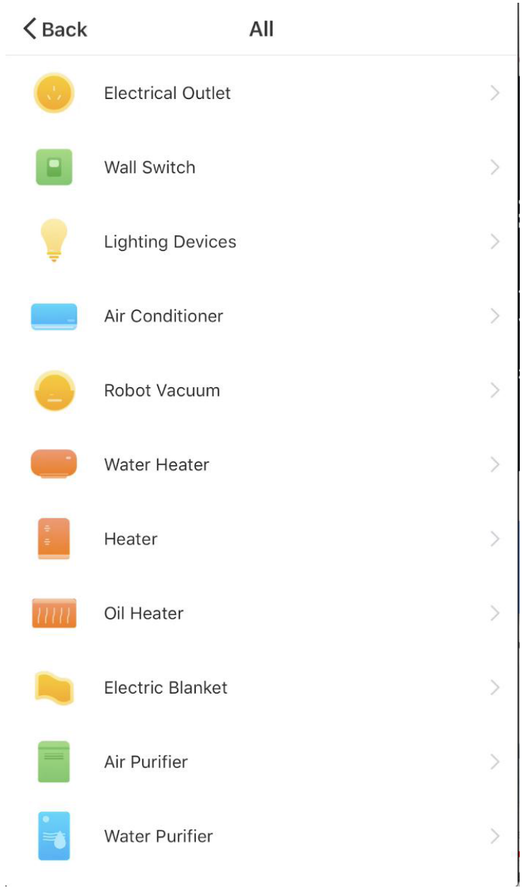

Administrators have the highest level of access, which allows them to manage access to devices or access granted to other household members

NO.3.2 Adding Devices - All Devices

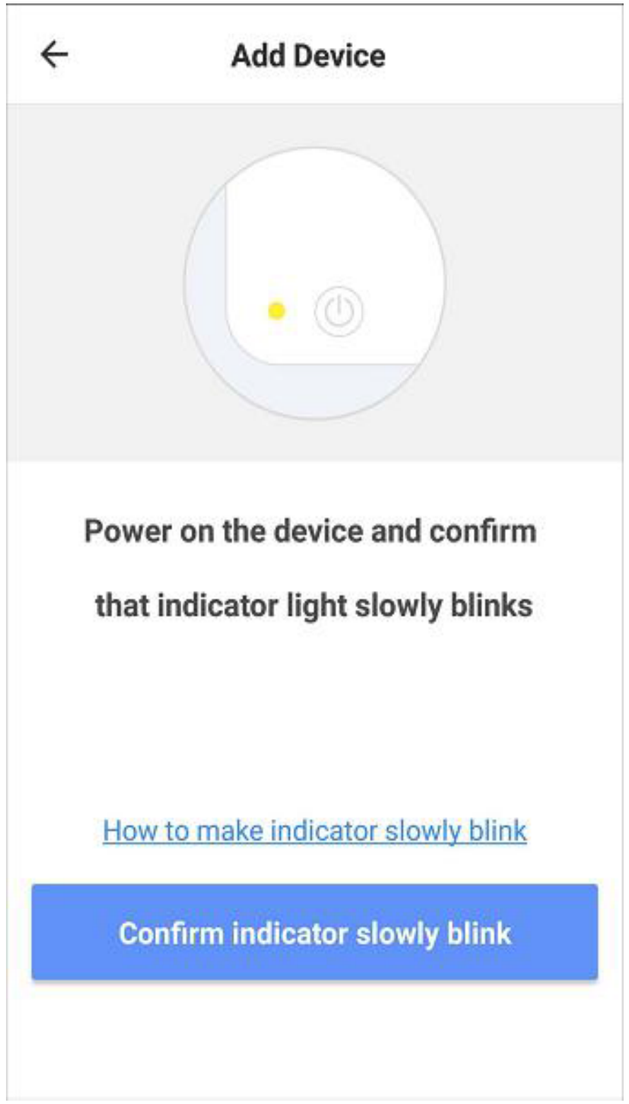

Click "Add Device" on the app home page or the "+" sign at the top right corner to go to the "All Devices" page, where devices can be selected and added as necessary

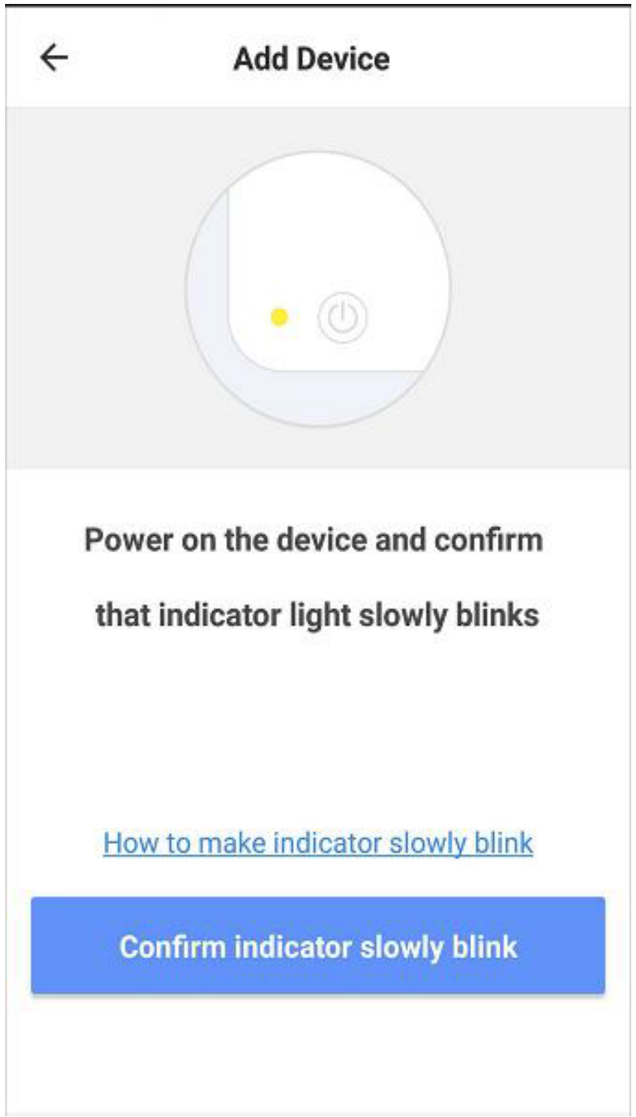

NO.3.2 Adding Devices - Default Mode

1. The app supports two configurations: Default mode and Compatibility mode. Click "Compatibility mode" at the top right corner of the "Default mode" home page to switch between modes
2. To select "Default mode", please make sure the indicator light on the smart device is flashing rapidly (blinking twice per second) and then click the button to proceed to the next step
3. If the indicator light is not flashing rapidly, click "How to set indicator light to rapid flashing" to view the instructions

Note: After pressing the "DISPLAY" button 3 times on the remote control, the indoor unit will beep 3 times and then start the default mode pairing

NO.3.2 Adding Devices - Compatibility Mode

1. To select "Compatibility mode", please make sure the indicator light on the smart device is flashing slowly (blinking once every three seconds) and then click the button to proceed to the next step.

2. If the indicator light is not flashing slowly, click "How to set indicator light to slow flashing" to view the instructions.

Note: After pressing the "DISPLAY" button 4 times on the remote control, the indoor unit will beep 4 times and then start the compatibility mode pairing

NO.3.2 Adding Devices - Enter Wi-Fi Password

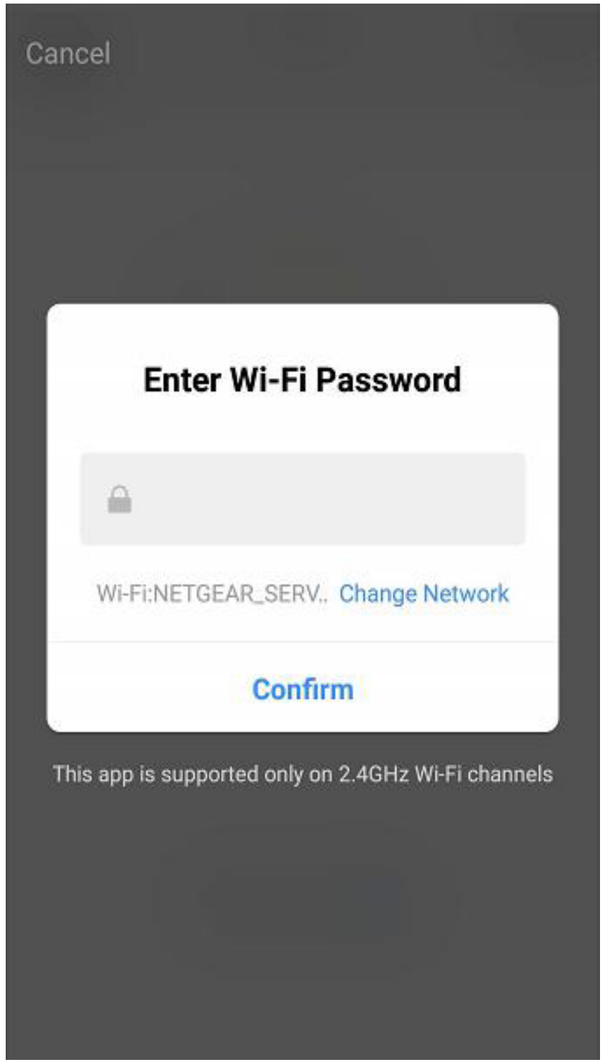

Fig. 1

In a selected mode, clicking "OK" on the page when the indicator light flashes rapidly/slowly will bring up the page shown in Fig. 1.

Select the Wi-Fi in the work area of a device that can enable successful Internet connection, enter the Wi-Fi password, and click "OK" to proceed to configuration

NO.3.2 Adding Devices - Configuration

If Default mode is selected, app configuration will be completed as shown in Fig. 1. Successful configuration will appear as shown in Fig. 2. Names of devices that have been configured successfully can be changed, and the locations of the rooms where the corresponding devices are can be selected.

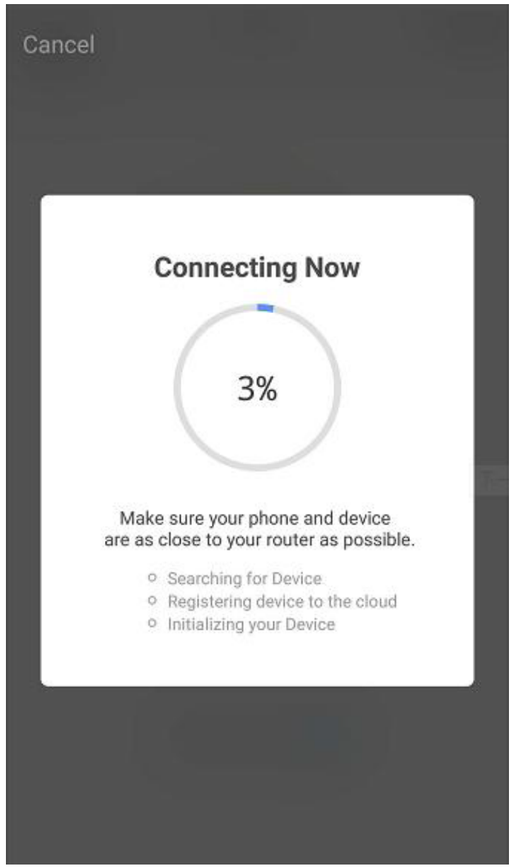

Fig. 1

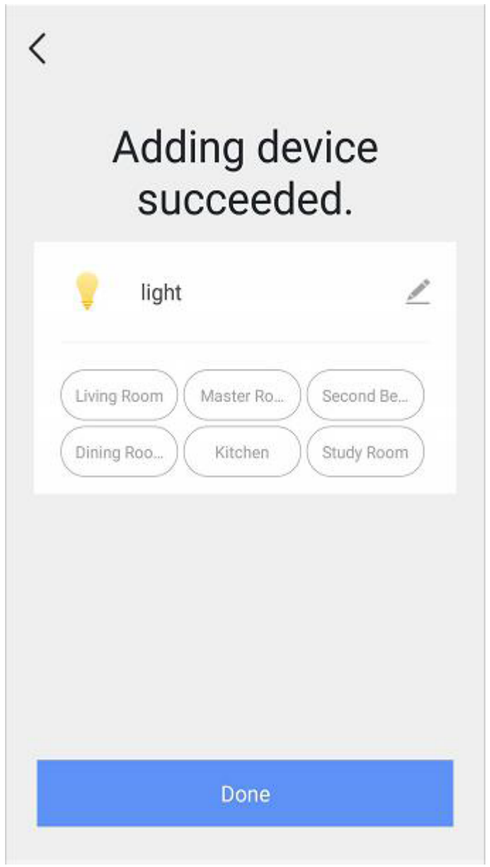

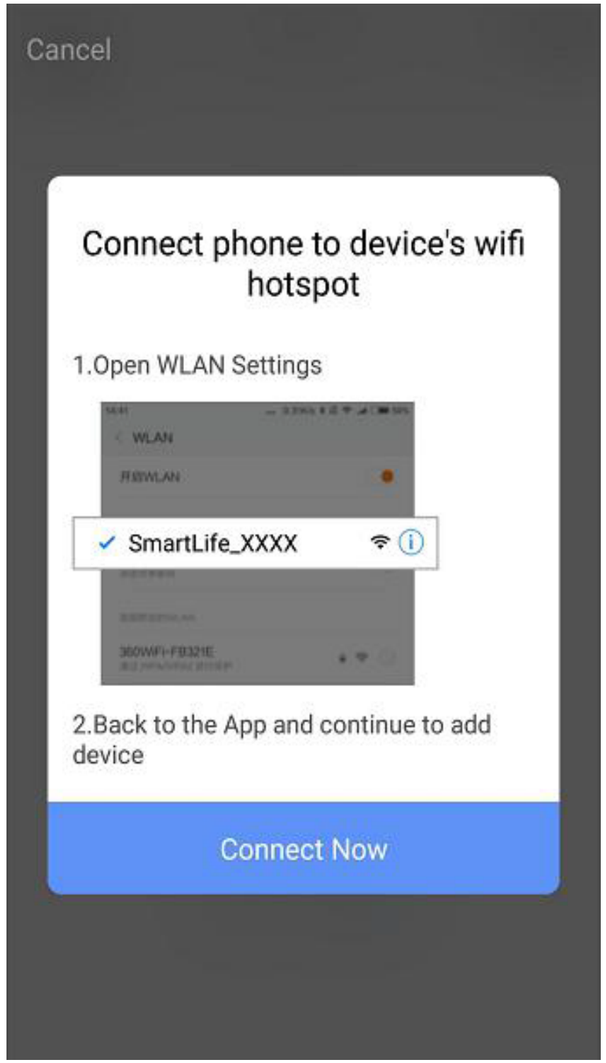

Fig. 2

NO.3.2 Adding Devices - Configuration

When in Compatibility (slow flashing) mode, you can select hotspot configuration, but connection must be made with the Wi-Fi hotspot whose name begins with "SmartLife", as shown in the figure

Note: Some hotspot names may be user-defined

NO.3.2 Adding Devices - Configuration

Connect to the specified hotspot and then return to the Configuration menu to proceed with configuration. The process in the app will be completed, as shown in Fig. 1
Successful configuration will appear as shown in Fig. 2

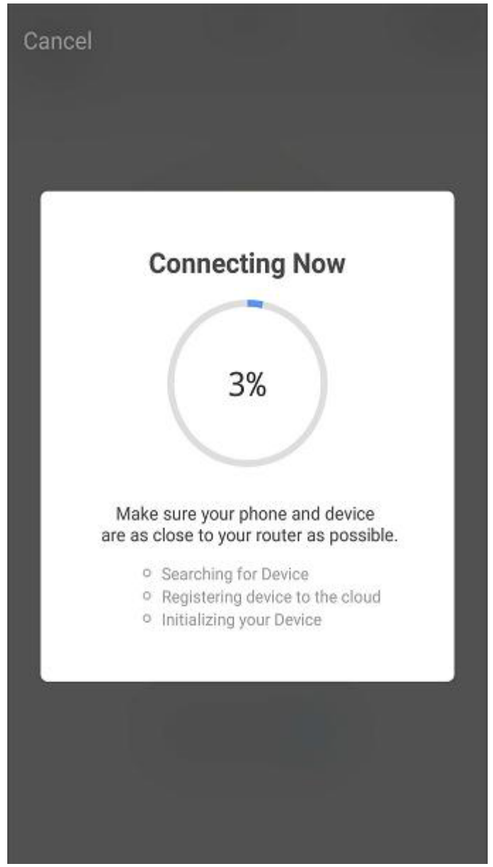

Fig. 1

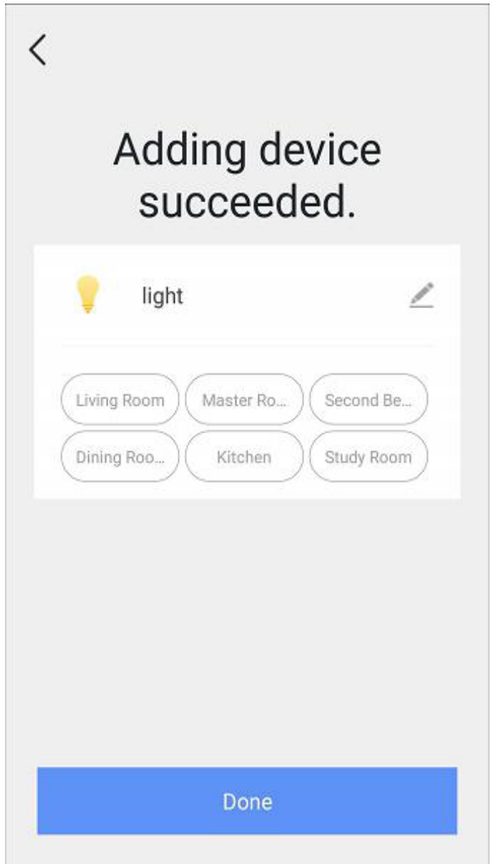

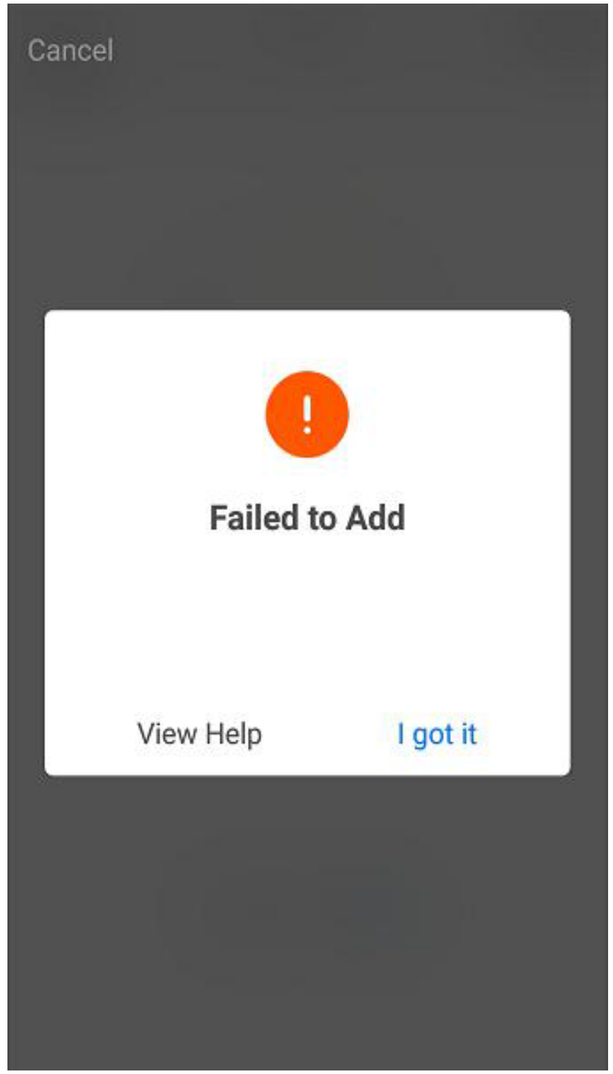

Fig. 2

NO.3.2 Adding Devices - Failure

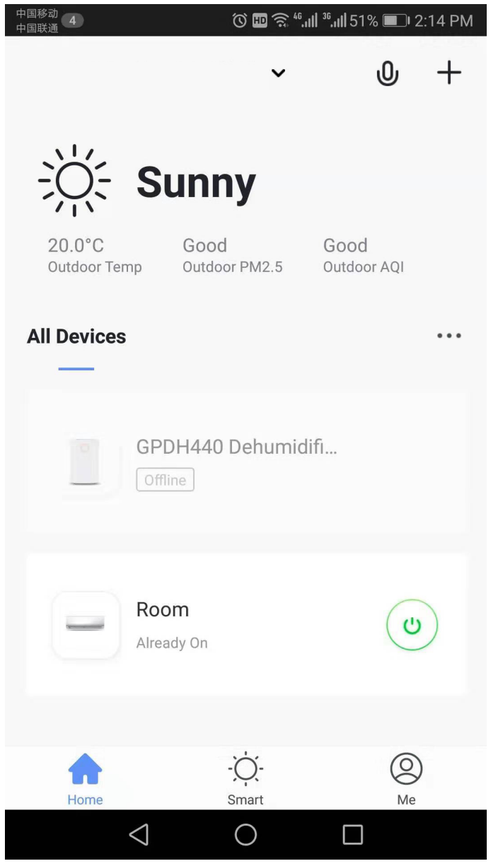

If configuration fails, it will appear as shown in the figure. You can choose to add again or go to Help for troubleshooting assistance

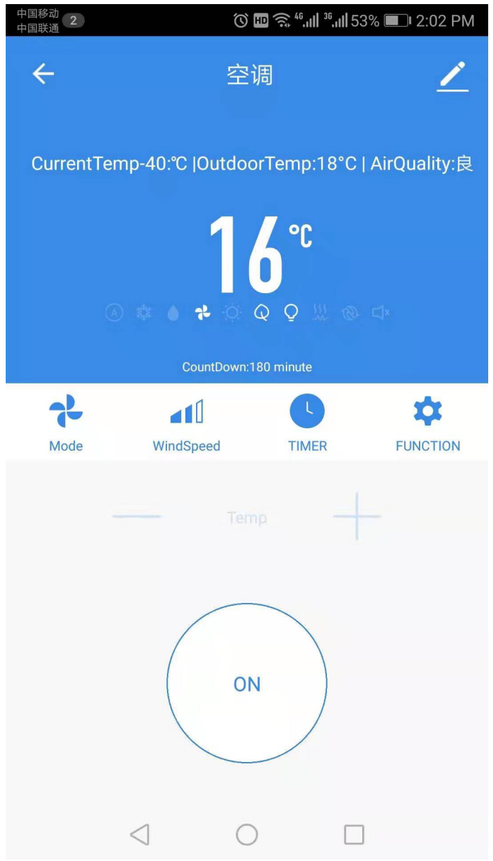

NO.4 App operation

Note: For the specific operation of the air conditioner, please refer to the instructions in the “Air Conditioner User Manual”.

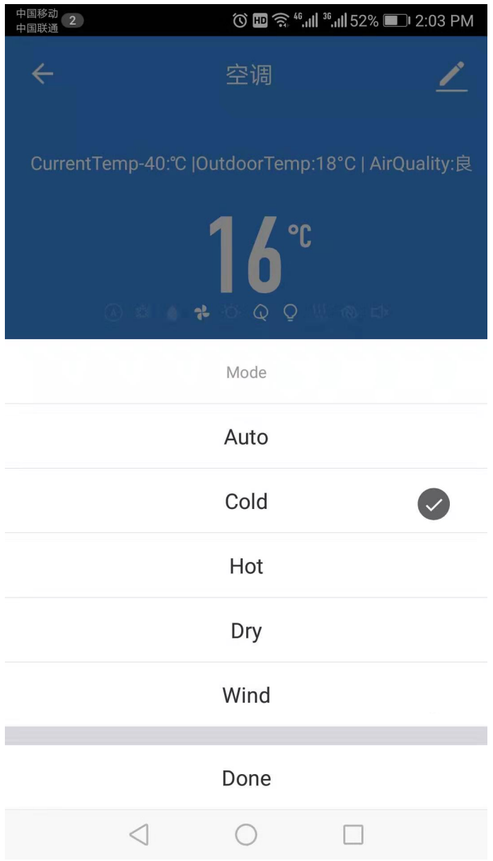

- The data of PM2.5 displayed on the APP is outdoor air quality, which is public data provided by the network rather than air conditioner detecting.
